

IMPORTANT: The water supply tap must initially be turned on extremely slowly. Failure to do this may activate the shut-off valve.

DO NOT remove the Flow Control Device. This may cause the shut-off valve to activate.

INSTALLATION: Product should be installed by a licensed plumber in compliance with AS/NZS 3499. Find a plumber via our PlumbConnect Registry by scanning the QR code. Turn off water supply & remove old hose. Clean all connecting threads. Install the end connection that has the BURST GUARD Water Shut-Off Valve at the tap or supply valve (nut displays an arrow showing the direction of the water flow →). Install other end to the fixture. **IMPORTANT: When first turning water supply on after installation, the tap must be opened extremely slowly.** Failure to complete this step can cause unwanted shut-offs. Check for leaks.

BURST GUARD WATER SHUT-OFF VALVE ACTIVATION: This connector is designed to shut off the water supply when the water flow exceeds 9LPM. When excess flow is detected, the valve will activate & the water flow will shut off until the valve is re-set. If the valve has been activated, inspect hose & replace if showing signs of wear, damage or leaking.

RESETTING THE BURST GUARD WATER SHUT OFF VALVE: Turn off water supply. Disconnect water connector at the water tap or supply valve end. Disconnection will re-set the device. Reconnect the water connector hose according to instructions. Test for leaks.

CAUTION: This connector is to be used with potable water only in exposed locations. Do not use inside walls or underground. Do not overtighten nuts. Do not stretch, twist or kink. Do not expose to naked flames, household cleaners or corrosive agents. Clean with water only. Keep away from heat. Do not connect to instant hot water heaters. For further instructions refer to relevant code requirements. Inspect hose regularly. Replace if showing signs of wear, or within seven years of the installation date.

WARRANTY Seven (7) year product warranty from the date of purchase. This warranty covers any defects in materials or workmanship with the exception of the reasons stated below. The warranty covers the product for normal domestic use only, with a one (1) year limited warranty for commercial applications. This warranty does not cover wear & tear to working parts, misuse or abuse. It does not cover discolourations due to exposure to sunlight or chemicals.

Our products come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure & for compensation for any other loss or damage. You are also entitled to have the goods repaired if the goods fail to be of acceptable quality & the failure does not amount to a major failure.

If you believe you have a claim please contact FIX-A-TAP® via our website at www.fixatap.com.au/warranty to fill out a claim form. Please keep receipt for proof of purchase. Any expenses incurred in making the claim will be the responsibility of the consumer.
