

# WINDOW PROTECTIVE FILM

## Product Information and Limited Warranty

**Please Read this Important Information on General Conditions for Application and Use of Window Protective Film.** Before using, the purchaser and/or user must determine suitability of this product for the intended use and the purchaser and/or user assumes all risks and liabilities in connection therewith. To determine suitability, test Window Protective Film on a small portion of one window or glass surface. For applications intended to exceed a 10-day period, leave Window Protective Film in place for at least 10 days and then inspect the surface where the product was applied to ensure the product is suitable for your application. On applications intended for less than a 10-day period, test Window Protective Film prior to full application on one window or glass surface for the desired application length to determine suitability.

## CAUTION!

**Failure to comply with the following instructions will void the warranty:**

- Do not apply to any surface other than glass windows or glass surfaces.
- Always apply Window Protective Film on a clean, dry surface only.
- Always test Window Protective Film on a small portion of one window or glass surface to determine suitability.
- For applications intended to exceed a 10-day period, a 10-day test is required for use prior to full application to determine suitability. On applications intended for less than a 10-day period, test Window Protective Film prior to full application on one window or glass surface for the desired application length to determine suitability.
- For temporary use only - remove or replace with new Window Protective Film on or before the completion of 30 days of application.
- If subjected to extreme weather conditions of temperatures exceeding 35°C or direct, intense sunlight for extended periods of time, it is recommended Window Protective Film be inspected and replaced with new material more frequently and as needed.
- Please review product information, instructions, warranty and application info before use.

## Product Information

Before applying Window Protective Film, please carefully read the following important information: Window Protective Film is for glass windows or glass surfaces, do not apply to any other surface or allow Window Protective Film to overlap beyond the window/glass area or onto hard surfaces such as wood, vinyl or aluminium. Use only on a completely dry surface. If subjected to extreme conditions of temperatures exceeding 35°C or direct, intense sunlight for extended periods of time, it is recommended Window Protective Film be inspected and replaced with new material more frequently and as needed. Window Protective Film is **for temporary protection up to 30 days, REMOVE ON 30TH DAY** or sooner.

## Product Storage Guidelines

For best performance, store at room temperature and out of direct sunlight exposure. If Window Protective Film is stored in extreme conditions (over 35°C or below 5°C), allow product to return to room temperature and always test before use. Not recommended for use after three months of purchase date.
