

HYDRO-TAIL™

UNIVERSAL CONTROLLED WATER ATTACHMENT

Hydro-Tail®

IMPORTANT!

It is essential that you read the instructions in this manual before assembling, operating, and maintaining the product.

WORK AREA SAFETY

- Keep work area clean and well lit. Cluttered or dark areas invite accidents.
- Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
- Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control

ELECTRICAL SAFETY

- If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. Use of an RCD reduces the risk of electric shock.

PERSONAL SAFETY

- Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.
- Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat or hearing protection used for appropriate conditions will reduce personal injuries.

ADDITIONAL SAFETY WARNINGS

- The product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the product by a person responsible for their safety. Children should be supervised to ensure that they do not play with the product.
- Clamp workpiece with a clamping device. Unclamped workpieces can cause severe injury and damage.
- Injuries may be caused, or aggravated, by prolonged use of a tool. When using any tool for prolonged periods, ensure you take regular breaks.

5 simple steps to cleaner, safer work.

Hydro-Tail™ is designed to be simple and efficiently attached to your power tools in less than one minute. With 5 simple steps, you can be working in a protected environment free of dangerous airborne particles like silica dust.

- Step 1: Extend Hydro-Tail® and Position on tool.
- Step 2: Secure Hydro-Tail® at preferred work area.
- Step 3: Adjust volume of water to required amount. (Do not over volume.) Adjust spray tip to fan or stream.
- Step 4: Direct spray tip only at point of contact (where diamond blade or bit meets the stone)
- Step 5: Use Hydro-Tail® to provide a safe work area, efficient cooling and control airborne silica dust.
